TROPICAL CYCLONE BULLETIN NR. 1
Tropical Depression NENENG

Issued at 5:00 PM, 18 August 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

THE LOW PRESSURE AREA EAST OF EXTREME NORTHERN LUZON DEVELOPED INTO TROPICAL DEPRESSION NENENG.

Location of Center (4:00 PM)

The center of Tropical Depression NENENG was estimated based on all available data at **1,025 km East of Extreme Northern Luzon (20.4°N, 131.8°E).**

Intensity

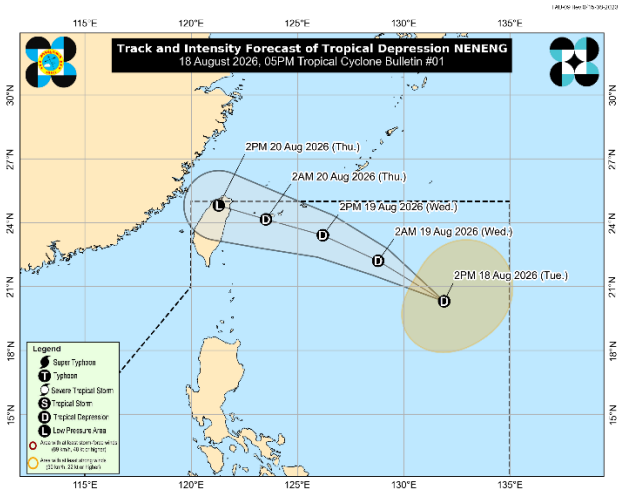
Maximum sustained winds of **45 km/h** near the center, gustiness of up to **55 km/h**, and central pressure of **1002 hPa**

Present Movement

Northwestward at 20 km/h

Extent of Tropical Cyclone Winds

Strong winds extend outwards up to **380 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 AM 19 August 2026	22.2	128.8	735 km East Northeast of Basco, Batanes	45	TD	WNW 30
24-Hour Forecast 2:00 PM 19 August 2026	23.4	126.2	535 km East Northeast of Itbayat, Batanes	45	TD	WNW 25
36-Hour Forecast 2:00 AM 20 August 2026	24.2	123.5	415 km North Northeast of Itbayat, Batanes	45	TD	WNW 25
48-Hour Forecast 2:00 PM 20 August 2026	24.8	121.3	450 km North of Itbayat, Batanes or in the vicinity of Taoyuan City, Taiwan	-	LOW	WNW 20

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal is currently hoisted

TROPICAL CYCLONE BULLETIN NR. 1
Tropical Depression NENENG
Issued at 5:00 PM, 18 August 2026
Valid for broadcast until the next bulletin at 11:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 68 issued at 5:00 PM today** for the heavy rainfall outlook due to the Southwest Monsoon.

Severe Winds

The enhanced Southwest Monsoon will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today (18 August):** Most of the country.
- **Tomorrow (19 August):** Most of Luzon and Visayas, Zamboanga Peninsula, Northern Mindanao, and Davao Region.
- **Thursday (20 August):** Most of Luzon and Visayas, Zamboanga Peninsula, Northern Mindanao, and Davao Region.

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

Up to rough seas over the following coastal waters:

- **Up to 3.5 m**: The seaboards of Zambales and Lubang Islands; the western seaboards of Pangasinan and Bataan.
- **Up to 3.0 m**: The seaboards of Ilocos Norte, Ilocos Sur, and Kalayaan Islands; the western seaboards of Babuyan Islands, Occidental Mindoro, Calamian Islands, northern Palawan, and Davao Oriental.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m**: The seaboards of La Union and Surigao del Sur; the western seaboards of Batanes, Cavite, Batangas, and mainland Palawan.
- **Up to 2.0 m**: The seaboards of Isabela, northern Aurora, Romblon, Cuyo Islands, Cagayancillo Islands, Antique, and Davao Occidental; the northern seaboards of Camarines Norte and Camarines Sur; the northern and eastern seaboards of Catanduanes and Northern Samar; the eastern seaboards of Albay, Sorsogon, Eastern Samar, Dinagat Islands, and Siargao-Bucas Grande Islands; the southern seaboards of Marinduque, Quezon, Iloilo, Guimaras, and Davao Oriental; the western seaboard of Negros Occidental; the remaining seaboards of Batanes, Pangasinan, Calamian Islands, and northern Palawan.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- NENENG will continue moving generally west northwestward throughout the forecast period. This tropical cyclone is less likely to make landfall over the country and will remain far from the Philippine landmass.
- NENENG is expected to be a short-lived tropical cyclone and is forecast to remain a tropical depression throughout the forecast period before weakening into a remnant low over Taiwan on Thursday (20 August).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
